Crime Vision: Advanced Crime Classification With Deep Learning

Develop shared understanding and empathy

Crime Vision aims to classify crimes based on their type from video or image input. This helps speed up law enforcement procedures by reducing workload helping in prioritizing crimes and allocating resources

Hear complaints from citizens that their case has not been resolved yet

Feedback to help reduce time and effort to solve cases

Difficulty of Identify crime

Lack of resources

What do they SAY?

What do they SEE?

What are they watching and reading?

What have we heard them say?

What do they DO?
